

Storage that **scales**.  
Design that **fits**.  
A solution for **every space**.

**H1/K + EP**

**EVO**

**POWERQ**

Flexible. Scalable. Cost-Effective.

Designed to Be Seen. Built to Perform.

Modular muscle. Compact power.

For homeowners who want maximum value with room to grow. Exceptional price-per-kWh and installation flexibility.

- Stackable design with high scalability
- Ideal for phased installs and evolving energy needs
- Perfect for those looking to optimise cost and performance

*Best for: Budget-conscious installs, flexible designs, and future scalability.*

EVO is where form meets function. A sleek, slimline wall-mounted AIO solution that doesn't just power your home — it enhances it.

- Elegant design with integrated inverter and battery
- Fully weatherproof for outdoor or indoor install
- A modern solution for modern homes

*Best for: Premium properties, aesthetic-conscious installs, and high-demand homes.*

The PowerQ redefines modular storage with a clean all-in-one design that's stackable up to 30kWh. No external battery cables. No compromises.

- High capacity in a compact footprint
- Add modules easily as your usage grows
- Fast installation with minimal wiring

*Best for: High-demand homes, fast installs, easy expansion and space-efficient setups.*

#### All-Weather Performance

Integrated battery heating for all-weather performance across all models. Outdoor-ready for ultimate installation flexibility.

**One Family. Every Scenario Covered.**

From compact homes to high-demand households, the FoxESS single phase range delivers powerful, intelligent storage that adapts to your needs — not the other way around. Whether you're after unbeatable value, expandable modular systems, or sleek integrated design, there's a solution in the Fox family that fits your space and your lifestyle.
